

GRAVITY FLOW HOPPERS

PHLAUER™

For cost effective storage of blended powders, granules, fibers, flakes, and pellets. *PHLAUER™* offers unparalleled quality and commitment to industry with several mass flow hopper designs.

Hopper Features:

- ☒ Custom mass-flow designs tailored to process requirements
- ☒ Hopper angles determined by your products flow characteristics including angle of repose
- ☒ Large hinged and clamped or bolted side access inspection/cleaning doors
- ☒ Square to round designs eliminate low valley angles and ensure product flow along the walls
- ☒ Various discharge designs including single or multiple discharge valves, variable pitch screw conveyors, flexible conveyors, pneumatic pick-up pans, and belt conveyors.

Hopper Benefits

- ☒ Virtually eliminate segregation problems
- ☒ Access for cleaning and routine scheduled maintenance
- ☒ Venting is designed
- ☒ Guaranteed to mate with *PHLAUER™* Mixer discharge flange

☒ Applications

- Food Industry
- Animal Feed
- Chemical Industry

- AJSP Hopper, 150 cu.ft. usable capacity, with three discharges off-set from centerline to eliminate bridging. One side wall is 68 degrees, the other is 73 degrees.

- AJSP Hopper, 250 cu.ft. usable capacity, funnel flow hopper design, flanged inlet to mate with mixer discharge, square to round transition, discharge with valve

- AJSP Hopper, 150 cu.ft. usable capacity, flanged inlet to mate with mixer discharge, variable pitch screw conveyor discharge for metered feed to next process
