

BAG DUMP WORKSTATIONS

PHLAUER™

For cost effective controlled dust environments. *PHLAUER™* offers unparalleled quality and commitment to industry with flange mounted and free standing work stations.

Work Station Features

- ☒ Flange mounted or Stand Alone
- ☒ Filtered or non-filtered designs
- ☒ Operator access area of 42" wide by 24" deep, including 6" loading shelf
- ☒ Hinged access door with two gas assist cylinders
- ☒ Removable two-piece grate
- ☒ Removable hanging baffle

Work Station Benefits

- ☒ High capture velocities with standard air flow of 1000 cfm
- ☒ Complete access to mixer or hopper with hanging baffle removed
- ☒ Only front access required for cleaning
- ☒ Wide operator access prevents "knuckle damage" while loading large bags
- ☒ Two piece grate is lighter than large single piece grate
- ☒ Grates have bars running away from operator for easy loading

- *PHLAUER™* flange mounted, non-filtered, T304 SS work station with "matched magnet" proximity switch preventing blender operation when cover is open.
